

## COMPREHENSIVE TEST – CIVIL HOUSE – 2021.09. 23- 09. 27.

### QUESTIONS – ANSWERS – SUMMARY

1. It is satisfactory to provide a parking lot for only **5 cars** altogether. The task description is changed accordingly. Principally it is possible to design the parking underground. However, this smaller number of cars can probably be solved on the surface as well.
2. The two plots can be merged with demolishing, or resituating the fences. The plot must be protected by fence, but open with gates during the day and closed during the night. Eventual more new pedestrian gates may be designed as well.
3. It is possible and strongly recommended to reevaluate the regulation, thus the minimum building height: min. 12,5m as well, so you can design a lower building.
4. The function of the new building to be designed ensures the district nurse service to be continued. The new building should be situated and designed accordingly.
5. The bigger and medium size public rooms may be used simultaneously. Thus you can estimate 200 visitors using the building at once.
